Through our platform you can create different projects. Our team will give you full support for successful realization. Every project created in our system is considered part of ALLBI, the goal is for all of us to form a large team of people to work on their projects.
<u>In our system, the following crypto projects were created:</u>

1. www.onLEXpa.com - One of the largest online training sites in Europe! **onLEXpa** uses its own **LEX Tokens** for online payments. When a customer pays a course with LEX Tokens, he gets big discount! Our goal is to make education around the world more and more accessible through **blockchain** technology!

2. https://ccp.allbestico.com - We have created a project for Crypto Price Platform (CPP Token). We created our project to help our investors with our forecasts!

3. www.clubrelaxa.com - We created an opportunity for our boutique restaurant partners to receive **payments** with **ALLBI Tokens**!

4. www.worldpolitics.allbestico.com - This is a platform that aims to create the opportunity for registered users on the site to initiate referendums on public and important issues. Everyone can vote freely, but only a user who owns **WP Tokens** can create a **Referendum**!

5. https://libraface.allbestico.com/ - **LibraF Tokens** - Here every person offers themselves and their own community skills. In this system you can offer **legal services, IT services, consulting services, and so on**. Each person gets money and a score for his work. Everyone shows their Face, with pre-legal contracts being generated for every job!

6. https://allbicash.allbestico.com/ - ALLBI Cash is the future of payments in the ALLBESTICO Family! With ALLBI Cash you can pay for any project created by the ALLBESTICO Family!

ABSTRACT

SUMMARY

ALLBESTICO (**ALLBI**) is a cryptocurrency based on the Ethereum blockchain which belongs to a class of ERC20 token standard. The ERC20 token standard describes the functions and events that an Ethereum tokencontract has to implement.

ERC20 is a technical standard used for smart contracts on the Ethereum blockchain for implementing tokens. ERC stands for Ethereum Request for Comment, and 20 is the number that was assigned to this request. The clear majority of tokens issued on the Ethereum blockchain are ERC20 compliant.

ERC20 defines a common list of rules for Ethereum tokens to follow within the larger Ethereum ecosystem, allowing developers to accurately predict interaction between tokens. These rules include how the tokens are transferred between addresses and how data within each token is accessed.

ERC20 defines a set of rules which need to be met in order for a token to be accepted and called an 'ERC20 Token'. The standard rules apply to all ERC20 Tokens since these rules are required to interact with each other on the Ethereum network. These tokens are blockchain assets that can have value and can be sent and received, like Bitcoin, Litecoin, Ethereum, or any other cryptocurrency.

The difference between these tokens and a standalone currency like Litecoin is that ERC20 tokens piggyback on the Ethereum network, hosted by Ethereum addresses and sent using Ethereum transactions.

This Whitepaper intents to give a brief and general outline about the usability of this new digital asset called **ALLBI** and how any member of public can participate and earn **ALLBI**. In this paper will explore how **ALLBI** will function as an alternative cryptocurrency, the products and services and rewards available through the ecosystems associated with **ALLBI**, the technical information of the product/digital asset (software specifications) named **ALLBI**, and how **ALLBI** is designed to provide a better experience for cryptocurrency users.

INTRODUCTION

What is **ALLBI**?

ALLBI is the first consumer-oriented cryptocurrency launched in the U.K. and Bulgaria by LEX PARTNERS LTD, a Sofia-based Service company which supports **ALLBI**. **ALLBI** works just like Bitcoin, but removes mining for profit. **ALLBI** aims to virtually eliminate mining for profit –the aspect of cryptocurrencies responsible for harming the environment, through wastage of electricity. The coins are stored on computers and transferred over the internet between digital "wallets-profile".

You can pay a certain amount of Ethereum (ETH) until 31/12/2019 or with ALLBI Tokens afterwards according to **Phase I to III** *(prices are listed on the site and in your account)* to create for your own CRYPTOCURRENCY. **ALLBI** is a digital asset.

*Once you receive ALLBI tokens in your profile, they will not be taken away. They remain at yours even if you decide to create your own ICO project. Over time, you can decide how to use your ALLBI Token.

With the development of our system, you will be able to:

● use your ALLBI Tokens to make payments to other projects created on our system;

● to sell your ALLBI Tokens to other peers directly from your profile;

● without using intermediaries or having commissions;

Of course you will also be able to sell your ALLBI tokens on different cryptocurrency exchanges!

*Ethereum (ETH) Address and **Phase I to III** *can be found on the last page!*

CRYPTOCURRENCY

WHAT IS CRYPTOCURRENCY?

Cryptocurrencies are digital systems (protocols) for exchanging value between participants on a decentralised computer network. Bitcoin (BTC) is the most famous and widely-adopted cryptocurrency.

Most cryptocurrencies use hard-to-solve cryptographic puzzles called "Proof of Work" to secure the operation of the network. The process of verifying the cryptographic solutions is commonly referred to as "mining". Bitcoin introduced a "reward"system, where the miner who solves a block is awarded a small amount of the cryptocurrency. This reward compensates the miner for contributing their hardware and electricity to the mining network.

The solution of a block is a vital operation to allow distributed consensus and add the block to the blockchain.

Technology-rooted movements like Bitcoin have demonstrated, through the power of the default, consensus mechanisms, and voluntary respect of the social contract, that it is possible to use the internet to make a decentralised value - transfer system, shared across the world and virtually free to use. This system can be said to be a very specialised version of a cryptographically secure, transaction-based state machine.

Ethereum:

Ethereum is a project which attempts to build the generalised technology; technology on which all transaction based state-machine concepts may be built. Moreover, it aims to provide to the end developer, a tightly integrated end-to-end system for building software on a hitherto unexplored compute paradigm in the mainstream: a trustful object messaging compute framework.

Ethereum has a blockchain which contains:

● Asset Tokens (ETH or ETC depending on which Ethereum!);

● A multitude of 'user generated' tokens that are created and managed through smart contracts;

● Hashes stored in smart contracts;

What is the difference between Cryptocurrency and **ALLBI**?

Cryptocurrencies like BitCoin are based on technology called mining for distribution of token, where as **ALLBI** is a new type of cryptocurrency (tokens), built on the basis of Ethereum technology. It offers maximum convenience, maximum security, and involves no bureaucracy. Anyone can review the contract of the currency via a link - TxHash:
0xf9e6099b7f606529f31cef4d0dada646920b220d1dadac9bcbbfdb726ca579db

The Enterprise Partner Group at Microsoft is on the front line, with some of the largest Ethereum technology customers. The **ALLBI** value creation does not depend on the activities of any particular company or individual but is dependent on the large scale participation and adoption of **ALLBI** by the global users who expects loyalty rewards in **ALLBI** in response to the acceptance offers made by businesses. This suggests creating value without any financial investments when a successful reward earning activity or trade happens.

BENEFITS

On traditional server architectures, every application has to set up its own servers that run their own code in isolated silos, making sharing of data hard. If a single app is compromised or goes offline, many users and other apps are affected. On a blockchain, anyone can set up a node that replicates the necessary data for all nodes to reach an agreement and be compensated by users and app developers. This allows user data to remain private and apps to be decentralised like the Internet was supposed to work.

ALLBESTICO (ALLBI) SPECIFICATIONS

Web: https://allbestico.com/

Full node: Ethereum MetaMask with ERC20 address from the above PROTOCOL.

ALLBI is issued using EToken protocol, which is a set of Ethereum smart contracts.

We use ETH network (the forked one).

SPECIFICATIONS

Primary project website: https://allbestico.com/

Supply: Adjustable

Symbol: **ALLBI**

Decimal places: 18

Transaction fees in **ALLBI**: Transaction fees in ETH: refunding to sender

ERC20 compatible contract address:

0x117aab3c3138ca7cb36d739481f5fb67e0580e2b

https://etherscan.io/token/0x117aab3c3138ca7cb36d739481f5fb67e0580e2b

TxHash:
0xf9e6099b7f606529f31cef4d0dada646920b220d1dadac9bcbbfdb726ca579db

SECURITY

The **ALLBI** wallet uses state-of-the-art wallet technology power by Ethereum smart contracts. Security features are implemented on the very fundamental level possible – inside Ethereum smart contracts. Independent security oracle services are used to authorise transactions inside the network.

ECOSYSTEM AND COMMUNITY

PRODUCTS AND SERVICES

We will work on creating your CryptoCurrency (ICO) Project! We are a team of exceptional programmers and visionaries who want to help each idea and together to change the world. We are one community together with every project created on our system. That is, you and we together are one! We will rely on hundreds of programmers to be able to meet your expectations of perfect and trouble-free work.

We are a direct reflection of your success! Each of you will receive individual attention to your project. Many experts will work for you. Do not hesitate to sign up for our site - The tokens are limited, Time is limited, but your options are NOT!

Make your project yourself or with friends and equip yourself with our unique system. Tell everyone and your tokens will sky-rocket! Our project is an innovation in the crypto world, as it creates a precedent in collaboration, communication and the development of relationships between project creators and every client. The goal of the project is to become one whole!

CONCLUSION

So far we have implemented important innovations in **ALLBI**, but we won't stop there. We have analysed the requirements for a CryptoCurrency for a fair economy, and have identified important features that will be implemented in the near future.

*Once you receive ALLBI tokens in your profile, they will not be taken away. They remain at yours even if you decide to create your own ICO project. Over time, you can decide how to use your ALLBI Token.

With the development of our system, you will be able to:

● use your ALLBI Tokens to make payments to other projects created on our system;

● to sell your ALLBI Tokens to other peers directly from your profile;

● without using intermediaries or having commissions;

Of course you will also be able to sell your ALLBI tokens on different cryptocurrency exchanges!

PAYMENT

Purchase your ALLBI Token using the following Ethereum (ETH) Address:
0xed0b26224D4629264B02f994Dcc4375DA3e6F9e4

Payment is made only with Ethereum (ETH):

Phase I GOLD - From 09.07.2018. until 31.12.2019.

- Make a payment of **10 ETH** =You will receive BONUS: 5000 ALLBI Tokens

Phase II Silver - From 01.01.2020 until 31.12.2020.

- Make a payment of **450 000 ALLBI Tokens!**

Phase III Bronze - From 01.01.2021 until 31.12.2022.

- Make a payment of **1 000 000 ALLBI Tokens!**

*Pay only to Ethereum (ETH) Address:
0xed0b26224D4629264B02f994Dcc4375DA3e6F9e4

After Payment you will get your ALLBI Tokens in your Profile!
